# Contents

## Volume 1

<b>1</b>	<b>The Comparative Anatomy of Islets . . . . .</b>	<b>1</b>
	R. Scott Heller	
<b>2</b>	<b>Microscopic Anatomy of the Human Islet of Langerhans . . . . .</b>	<b>19</b>
	Peter In't Veld and Silke Smeets	
<b>3</b>	<b>Basement Membrane in Pancreatic Islet Function . . . . .</b>	<b>39</b>
	Eckhard Lammert and Martin Kragl	
<b>4</b>	<b>Approaches for Imaging Pancreatic Islets: Recent Advances and Future Prospects . . . . .</b>	<b>59</b>
	Xavier Montet, Smaragda Lamprianou, Laurent Vinet, Paolo Meda, and Alfredo Fort	
<b>5</b>	<b>Mouse Islet Isolation . . . . .</b>	<b>83</b>
	Simona Marzorati and Miriam Ramirez-Dominguez	
<b>6</b>	<b>Regulation of Pancreatic Islet Formation . . . . .</b>	<b>109</b>
	Manuel Carrasco, Anabel Rojas, Irene Delgado, Nadia Cobo Vuilleumier, Juan R. Tejedo, Francisco J. Bedoya, Benoit R. Gauthier, Bernat Soria, and Franz Martín	
<b>7</b>	<b>(Dys)Regulation of Insulin Secretion by Macronutrients . . . . .</b>	<b>129</b>
	Philip Newsholme, Kevin Keane, Celine Gaudel, and Neville McClenaghan	
<b>8</b>	<b>Physiology and Pathology of the Anomeric Specificity for the Glucose-Induced Secretory Response of Insulin-, Glucagon-, and Somatostatin-Producing Pancreatic Islet Cells . . . . .</b>	<b>157</b>
	Willy J. Malaisse	
<b>9</b>	<b>Physiological and Pathophysiological Control of Glucagon Secretion by Pancreatic <math>\alpha</math>-Cells . . . . .</b>	<b>175</b>
	Patrick Gilon, Rui Cheng-Xue, Bao Khanh Lai, Hee-Young Chae, and Ana Gómez-Ruiz	

<b>10</b>	<b>Electrophysiology of Islet Cells</b> . . . . .	249
	Gisela Drews, Peter Krippeit-Drews, and Martina Düfer	
<b>11</b>	<b>ATP-Sensitive Potassium Channels in Health and Disease</b> . . . . .	305
	Peter Proks and Rebecca Clark	
<b>12</b>	<b><math>\beta</math> Cell Store-Operated Ion Channels</b> . . . . .	337
	Colin A. Leech, Richard F. Kopp, Louis H. Philipson, and Michael W. Roe	
<b>13</b>	<b>Anionic Transporters and Channels in Pancreatic Islet Cells</b> . . . .	369
	Nurdan Bulur and Willy J. Malaisse	
<b>14</b>	<b>Chloride Channels and Transporters in <math>\beta</math>-Cell Physiology</b> . . . . .	401
	Mauricio Di Fulvio, Peter D. Brown, and Lydia Aguilar-Bryan	
<b>15</b>	<b>Electrical, Calcium, and Metabolic Oscillations in Pancreatic Islets</b> . . . . .	453
	Richard Bertram, Arthur Sherman, and Leslie S. Satin	
<b>16</b>	<b>Exocytosis in Islet <math>\beta</math>-Cells</b> . . . . .	475
	Haruo Kasai, Hiroyasu Hatakeyama, Mitsuyo Ohno, and Noriko Takahashi	
<b>17</b>	<b>Zinc Transporters in the Endocrine Pancreas</b> . . . . .	511
	Mariea Dencey Bosco, Chris Drogemuller, Peter Zalewski, and Patrick Toby Coates	
<b>18</b>	<b>High-Fat Programming of <math>\beta</math>-Cell Dysfunction</b> . . . . .	529
	Marlon E. Cerf	
<b>19</b>	<b>Exercise-Induced Pancreatic Islet Adaptations in Health and Disease</b> . . . . .	547
	Sabrina Grassioli, Antonio Carlos Boschero, Everardo Magalhães Carneiro, and Cláudio Cesar Zoppi	
<b>20</b>	<b>Molecular Basis of cAMP Signaling in Pancreatic <math>\beta</math> Cells</b> . . . . .	565
	George G. Holz, Oleg G. Chepurny, Colin A. Leech, Woo-Jin Song, and Mehboob A. Hussain	
<b>21</b>	<b>Calcium Signaling in the Islets</b> . . . . .	605
	Md. Shahidul Islam	
<b>22</b>	<b>Role of Mitochondria in <math>\beta</math>-Cell Function and Dysfunction</b> . . . . .	633
	Pierre Maechler, Ning Li, Marina Casimir, Laurène Vetterli, Francesca Frigerio, and Thierry Brun	
<b>23</b>	<b>IGF-1 and Insulin-Receptor Signalling in Insulin-Secreting Cells: From Function to Survival</b> . . . . .	659
	Susanne Ullrich	

<b>24</b>	<b>Circadian Control of Islet Function</b> . . . . .	687
	Jeongkyung Lee, Mousumi Moulik, and Vijay K. Yechoor	

**Volume 2**

<b>25</b>	<b>Wnt Signaling in Pancreatic Islets</b> . . . . .	707
	Joel F. Habener and Zhengyu Liu	
<b>26</b>	<b>Islet Structure and Function in the GK Rat</b> . . . . .	743
	Bernard Portha, Grégory Lacraz, Audrey Chavey, Florence Figeac, Magali Fradet, Cécile Tourrel-Cuzin, Françoise Homo-Delarche, Marie-Hélène Giroix, Danièle Bailbé, Marie-Noëlle Gangnerau, and Jamileh Movassat	
<b>27</b>	<b><math>\beta</math>-Cell Function in Obese-Hyperglycemic Mice (<i>ob/ob</i> Mice)</b> . . . . .	767
	Per Lindström	
<b>28</b>	<b>Role of Reproductive Hormones in Islet Adaptation to Metabolic Stress</b> . . . . .	785
	Ana Isabel Alvarez-Mercado, Guadalupe Navarro, and Franck Mauvais-Jarvis	
<b>29</b>	<b>The <math>\beta</math>-Cell in Human Type 2 Diabetes</b> . . . . .	801
	Lorella Marselli, Mara Suleiman, Farooq Syed, Franco Filipponi, Ugo Boggi, Piero Marchetti, and Marco Bugliani	
<b>30</b>	<b>Pancreatic <math>\beta</math> Cells in Metabolic Syndrome</b> . . . . .	817
	Marcia Hiriart, Myrian Velasco, Carlos Manlio Diaz-Garcia, Carlos Larqué, Carmen Sánchez-Soto, Alondra Albarado-Ibañez, Juan Pablo Chávez-Maldonado, Alicia Toledo, and Neivys García-Delgado	
<b>31</b>	<b>Apoptosis in Pancreatic <math>\beta</math>-Cells in Type 1 and Type 2 Diabetes</b> . . . . .	845
	Tatsuo Tomita	
<b>32</b>	<b>Mechanisms of Pancreatic <math>\beta</math>-Cell Apoptosis in Diabetes and Its Therapies</b> . . . . .	873
	James D. Johnson, Yu Hsuan Carol Yang, and Dan S. Luciani	
<b>33</b>	<b>Clinical Approaches to Preserving <math>\beta</math>-Cell Function in Diabetes</b> . . . . .	895
	Bernardo Léo Wajchenberg and Rodrigo Mendes de Carvalho	
<b>34</b>	<b>Role of NADPH Oxidase in <math>\beta</math> Cell Dysfunction</b> . . . . .	923
	Jessica R. Weaver and David A. Taylor-Fishwick	
<b>35</b>	<b>The Contribution of Reg Family Proteins to Cell Growth and Survival in Pancreatic Islets</b> . . . . .	955
	Qing Li, Xiaoquan Xiong, and Jun-Li Liu	

<b>36</b>	<b>Inflammatory Pathways Linked to <math>\beta</math> Cell Demise in Diabetes</b> . . . . .	989
	Yumi Imai, Margaret A. Morris, Anca D. Dobrian, David A. Taylor-Fishwick, and Jerry L. Nadler	
<b>37</b>	<b>Immunology of <math>\beta</math>-Cell Destruction</b> . . . . .	1047
	Åke Lernmark and Daria LaTorre	
<b>38</b>	<b>Current Approaches and Future Prospects for the Prevention of <math>\beta</math>-Cell Destruction in Autoimmune Diabetes</b> . . . . .	1081
	Carani B. Sanjeevi and Chengjun Sun	
<b>39</b>	<b>In Vivo Biomarkers for Detection of <math>\beta</math> Cell Death</b> . . . . .	1115
	Simon A. Hinke	
<b>40</b>	<b>Proteomics and Islet Research</b> . . . . .	1131
	Meftun Ahmed	
<b>41</b>	<b>Advances in Clinical Islet Isolation</b> . . . . .	1165
	Andrew R. Pepper, Boris Gala-Lopez, and Tatsuya Kin	
<b>42</b>	<b>Islet Isolation from Pancreatitis Pancreas for Islet Autotransplantation</b> . . . . .	1199
	A. N. Balamurugan, Gopalakrishnan Loganathan, Amber Lockridge, Sajjad M. Soltani, Joshua J. Wilhelm, Gregory J. Beilman, Bernhard J. Hering, and David E. R. Sutherland	
<b>43</b>	<b>Human Islet Autotransplantation</b> . . . . .	1229
	Martin Hermann, Raimund Margreiter, and Paul Hengster	
<b>44</b>	<b>Successes and Disappointments with Clinical Islet Transplantation</b> . . . . .	1245
	Paolo Cravedi, Piero Ruggerenti, and Giuseppe Remuzzi	
<b>45</b>	<b>Islet Xenotransplantation: An Update on Recent Advances and Future Prospects</b> . . . . .	1275
	Rahul Krishnan, Morgan Lamb, Michael Alexander, David Chapman, David Imagawa, and Jonathan R. T. Lakey	
<b>46</b>	<b>Islet Encapsulation</b> . . . . .	1297
	Jonathan R. T. Lakey, Lourdes Robles, Morgan Lamb, Rahul Krishnan, Michael Alexander, Elliot Botvinick, and Clarence E. Foster	
<b>47</b>	<b>Stem Cells in Pancreatic Islets</b> . . . . .	1311
	Erdal Karaöz and Gokhan Duruksu	

---

<b>48</b>	<b>Generating Pancreatic Endocrine Cells from Pluripotent Stem Cells</b> . . . . .	1335
	Blair K. Gage, Rhonda D. Wideman, and Timothy J. Kieffer	
<b>49</b>	<b>Pancreatic Neuroendocrine Tumors</b> . . . . .	1375
	Apostolos Tsolakis and George Kanakis	
	<b>Index</b> . . . . .	1407
